READING

J5, midfielder, 93 min: **11.70 km** at 126 m/min, rank 2 of 10 outfield players; high speed rank 1, mechanical load rank 1.

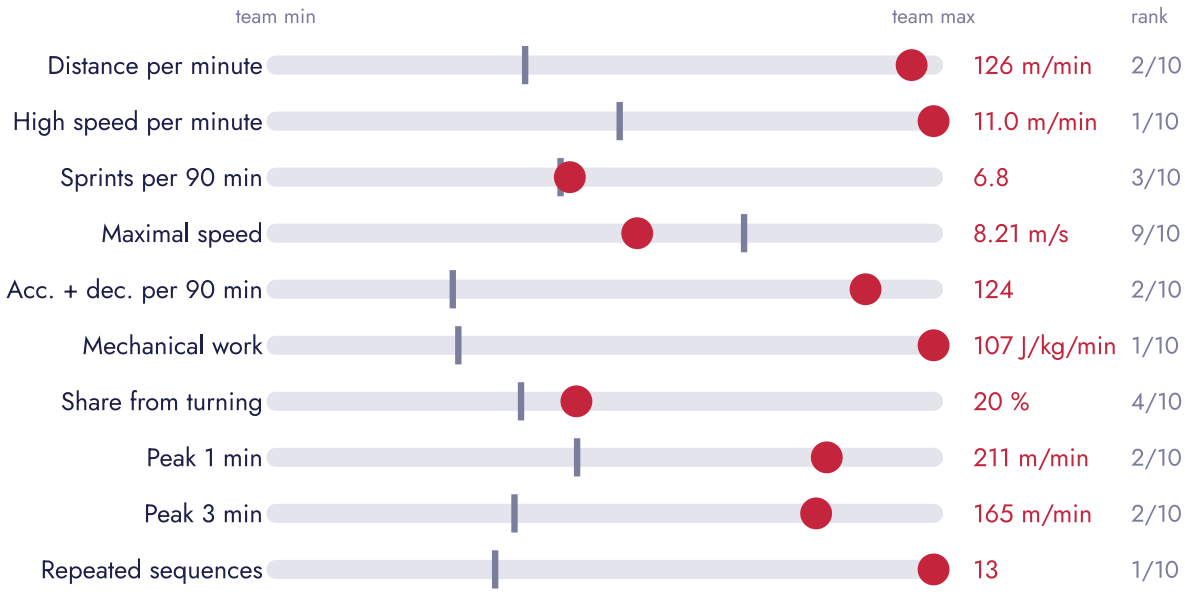

7 sprints above 7 m/s (max speed 8.21 m/s), 4 of them out of possession; 13 sequences of repeated high-speed efforts.

Out of possession he runs 19 % more than in possession (160 vs 135 m/min).

From the first to the second half his distance per minute changes by **-17 %** (team: -13 %).

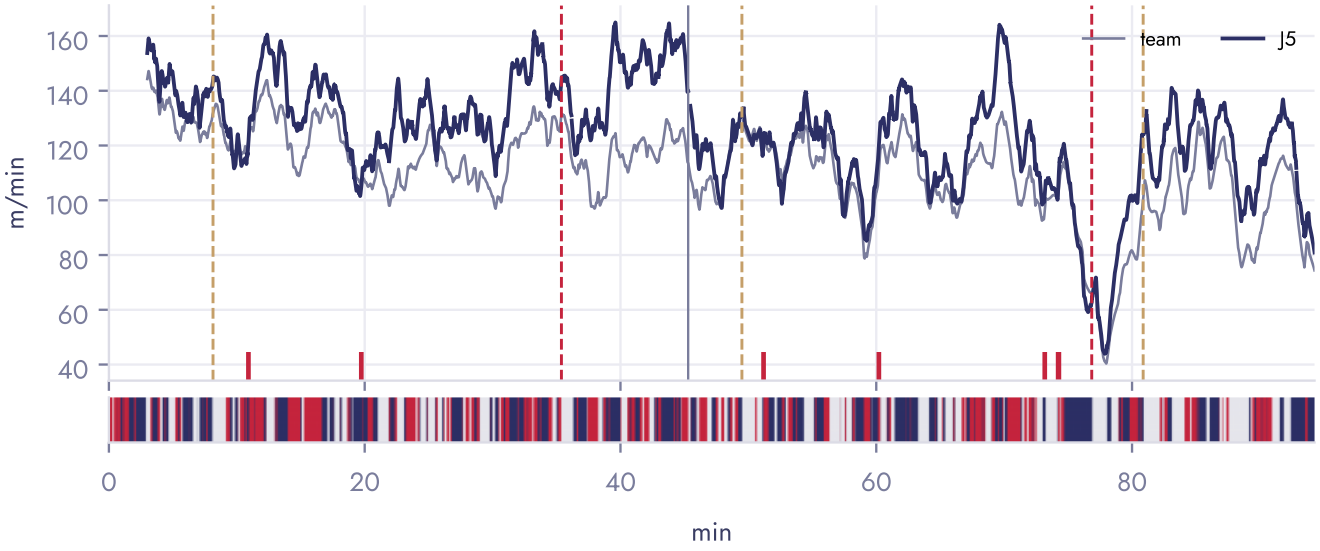

20 % of his mechanical work comes from turning; his most intense minute reaches **211 m/min** in minute 11.

1.1 His profile against the team

Red dot: J5; grey tick: team median; bar: lowest to highest outfield player (≥ 45 min). Rank: 1 = highest value.

02 HIS MATCH MINUTE BY MINUTE

Distance per minute (3-min rolling average), player and team; red ticks: sprints; dashes: goals (gold for, red against). Bottom strip: in possession (blue), out of possession (red), ball dead (grey).

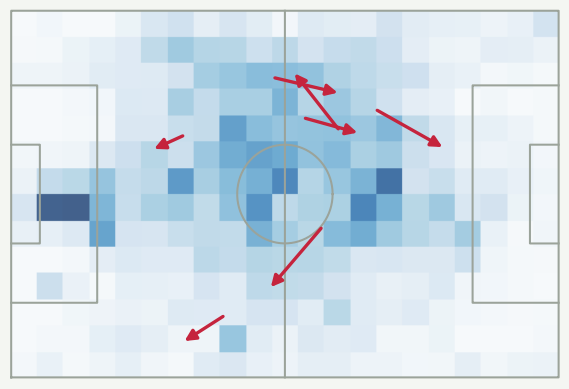

2.1 By game context

	MIN	M/ MIN	TEAM	HSR/ MIN	TEAM	W/ KG
In possession	34	135	115	13.3	7.7	1.98
Out of possession	28	160	141	19.3	11.5	2.63
Ball dead	29	80	74	0.6	0.8	0.68

2.2 Between halves

	1ST HALF	2ND HALF	CHANGE
Distance / min	138	114	-17 %
High speed / min	11.5	10.6	-8 %
Sprints / 45 min	2.0	4.7	133 %
Power (W/kg)	2.01	1.56	-22 %
Turning share (%)	20	21	3 %

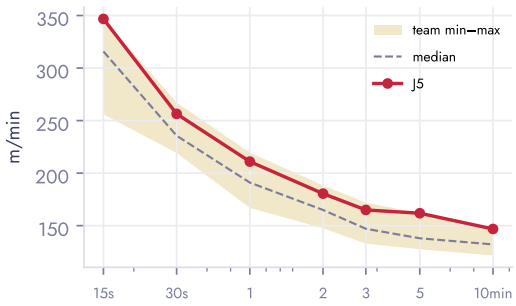

03 HIS SPRINTS AND HIS AREA

Pitch occupation (blue) and sprints (arrows); team attacking to the right.

MIN	DURATION	V MAX	ENTRY V	M	CONTEXT
11′	2.0 s	7.22	7.00	14	In possession
20′	2.3 s	7.31	7.01	16	In possession
52′	2.0 s	8.21	7.01	15	Out of possession
61′	1.1 s	7.13	7.01	8	Out of possession
74′	1.7 s	7.53	7.03	12	In possession
75′	2.2 s	7.64	7.05	17	Out of possession
75′	1.5 s	7.32	7.01	11	Out of possession

04 HIS PEAK DEMANDS

Peak distance per minute by duration, against the team.

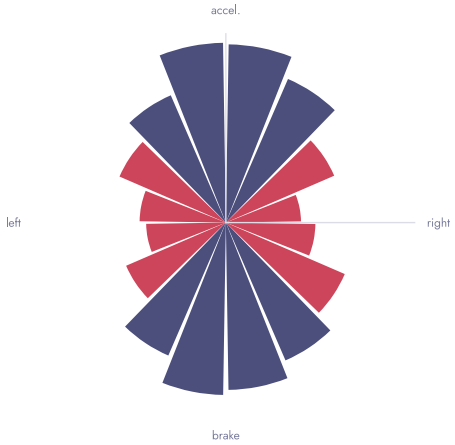

WINDOW	J5	TEAM MEDIAN	RANK
1 min	211	191	2/10
3 min	165	147	2/10
5 min	162	138	1/10

4.1 Training targets from his match

BLOCK	HIS PEAK	80 %	90 %
1 min	211	169	190
3 min	165	132	148
5 min	162	129	146

m/min to aim for in a drill of the same length to reproduce 80–90 % of his match peak.

05 HIS MECHANICAL LOAD

Movement signature: work by orientation of the acceleration.

MANOEUVRE	COUNT	SHARE OF WORK	OF WHICH LEFT
Accelerations	194	14 %	—
Decelerations	180	13 %	—
Turns	418	45 %	47 %
Curved accelerations	167	13 %	51 %
Curved braking	158	14 %	53 %

Left/right turning balance: -2 % (positive = more to the left).

06 LEADS FOR THE WEEK

Recovery — Mechanical load among the team's highest: recovery first at D+1 and D+2, reduced running volume.

07 METHOD

Compared with the team's outfield players with ≥ 45 min. High speed > 5.5 m/s, sprint > 7 m/s held 1 s, repeated sequences ≤ 60 s apart (Buchheit et al. 2010), peaks over rolling windows (Varley et al. 2012). Context from the match events (possession = team of the last on-ball event). Mechanical load: speed (Gray et al. 2018) and turning (Cavagna et al. 1976), open horizontal model.

Data: Metrica Sports sample data, game 2, Home team.

Report generated by peakdemands 0.1.0. Indicative leads, to be crossed with the player's feedback, the medical staff and the schedule.
